

Setup instructions Tour-Tipi

Supply: Cover (100 % cotton, waterproof), pegs, rope

You need: one middle pole - approx 2.80 m,
2 bars – approx. 1.20 m for the door flap

Setup Instructions

1. Please look for an even, clean surface. Spread the tent on the ground (in a diameter of approx 3.50 m, try to draw a circular arc) and fasten it loosely with pegs.
2. Put the pole through the small hole in the middle of the cover (before that, place the wooden ball in the middle – to protect the cover) and setup the tent.
3. Stretch all the pegs
4. Put the wooden bars in the tunnels under and above the door flap. It is possible to make a canapé roof with the bars and the door flap.
5. Make only small fires due to security reasons.

Care Instructions

1. Please often control the pegs. The cover always has to be well strained.
 2. Close smoke flap on rainy weather.
 3. Always aerate well.
 4. Store Tour-Tipi in a dry place since the cover is 100 % cotton.
5. You can clean or dry it with a special agent for cotton fabric
 6. Please store well packed - mice love smoked material.

Enjoy your Tour-Tipi!
