

## Setup instructions Shelter

1. Look for an even surface, according to plan. You can either setup the shelter under a tree or with a tripod of poles.
2. Spread out the tarp, in the way you want the tent to stand
3. Lay the entrance to the east (lee side)
4. Attach the rope to tree or poles, pull up the tent until loops of the tarpaulin are just on the ground
5. Join the cover at the front with lacing pins.
6. Tighten the cover.

Smoke outlet can be fastened and regulated on the outside  
Because of safety please only make a small fire and secure fireplace with stones.

### **Notice:**

After using the tent please dry it – only pack when totally dry.  
With longer storage wrap the tent carefully because mice love tents.
