

Setup instructions Trapperlodge

1. Spread out the tent on an even and clean place with enough space. The roof with the loops should be upturned.
2. At first you have to tie the two longer poles (1) to the sides of the roof.
3. Now you have to put the other poles (2) at the bottom and at the top of the roof and bind together with the first poles (1) with the aid of a rope or a leather strap.
4. Strap the loops at the poles.
5. Include the central pole (M).
6. Ensure the tent aback.
7. Attach the stilt in front, put up the tent and strap the stilt to the crossbar.
8. Tighten the tent.
9. Insert the canopy pole and include the stilts.
10. Put up the canopy and tighten it.
11. For stabilization you can put another pole right and left of the canopy.
12. The tent has a wide tuck. There you can insert poles to stabilize the tarpaulin.
