Setup instructions Norman Tent

1. Spread out the tent on a big enough, even and clean place, so that the first band/stripe is on top.

2. First you have to fix the loops the back (not to hard, yet).

3. Insert the ridgepole (1).

4. Put up the two upright poles (2). It is good if you have a second person holds the poles upright.

5. Now, put all the pegs into the loops, fix and tighten it.

Notice:
After using the tent please dry it – only pack when totally dry.
With longer storage wrap the tent carefully because mice love tents.
