

Setup instructions Saxon Tent

1. Spread out the tent on a big enough, even and clean place, so that the first band/stripe is on top.
2. First you have to fix the loops in the back (not to strong, yet).
3. Insert the ridgepole (1).
4. Put up the two upright poles (2). It is good if you have a second person holds the poles upright.
5. Now, put all the pegs into the loops, fix and tighten them.

To use the front part of the tent as a canopy, you insert the longer pole into the tunnel and then you put it up with the other 2 poles. Afterwards you need to tighten it.

Notice:

After using the tent please dry it – only pack when totally dry.
With longer storage wrap the tent carefully because mice love tents.
